• Fluency in English

Wünschenswerte Qualifikationen:

• Proficiency in data analysis and programming (Python, R, Matlab)

Stellenzusatz

The position will be available in December 2024, and it is initially funded for three years with the option to be extended. Salary and benefits are based on the public service positions in Germany (TV-L).

The Friedrich-Alexander Universität Erlangen-Nürnberg strives to increase the proportion of women in research and teaching and therefore expressly requests applications from suitable qualified female scientists. Severely handicapped applicants will be employed preferentially if their aptitude is otherwise essentially the same.

Please submit your electronic application including a brief cover letter describing your previous research experience and current interests, CV, and the names of two potential referees to:
